

AFFORDABLE
CONTRACT PROOFING

ProofMaster[®]

WWW.PROOFMASTER.CLOUD

ProofMaster

ProofMaster is the most affordable contract proofing software on the market today. ProofMaster proofs accurately reproduce greys, subtle colors and spot colors. You won't need to do a thing – the iterative profile tuning, CxF/X-3 spot color libraries, and proof certification functions will take care of it all for you.

ProofMaster's VISU color-profiling engine has a '3-Click' software wizard that lets anyone create highly accurate device-link proofing profiles, quickly and easily. Thanks to its device recalibration function, ProofMaster will let you close-loop calibrate two or more devices to a single calibration profile – wherever they are in the world – which means you're getting the ultimate in proof-to-proof reliability.

ProofMaster comes in two flavors: ProofMaster (CMYK device-link profiles), and ProofMaster Plus (multi-channel device-link profiles)

ProofMaster vs ProofMaster Plus

ProofMaster and ProofMasterPlus are compatible with Epson, HP and Canon Aqueous inkjet printers.

ProofMaster Plus is also compatible with Mimaki, Mutoh and Roland UV and Eco-Solvent printers. This makes it ideal if you're proofing on your own substrates, making prototypes for packaging, or creating proofs for extended color gamut printing (XG) up to 8 separations per profile.

ProofMaster - for standard proofing.

- VISU CMYK ICC device-link profiles
- Wizard based profile tuning
- CxF/X-3 Spot color libraries included
- Proof Certification module
- Delta-e 76 and Delta-e 2000 measure modes

Supported printers: Canon, Epson, HP Aqueous inkjet devices.

ProofMaster Plus - for packaging design.

- VISU Multi-channel ICC device-link profiles
- Wizard based profile tuning
- CxF/X-3 spot color libraries included
- CxF/X-4 support for spot color gradations
- Proof Certification module
- D-e 76 and D-e 2000 measure modes

Supported printers: Canon, Epson, HP Aqueous inkjet devices. Epson, Mimaki, Mutoh and Roland UV and Eco-Solvent inkjet devices.

Benefits

Better proofing

- ISO Color standardized output
- CMYK profiles for bespoke fingerprinting (ProofMaster)
- Support for all PDF standards (GWG, PDF-x4...)
- Multi-channel profiles for extended gamut printing, proofing and packaging designs (ProofMaster Plus)
- Supports a wide range of printer and substrate combinations (ProofMaster Plus)

Better quality all round

- An intuitive user interface makes calibration profiling and fine-tuning easier
- ProofMaster Layout guarantees rapid, simple layouts at the best fit and reduces media wastage
- Paper white point simulation lets you match the color of the press production paper closely

Better printing, better processes

- Create CMYK and Multi-channel ICC soft-proofing and separation profiles for use in Adobe and other pre-press applications.
- Your proofing accuracy goes up – so will your production. Simply plug in extra print drivers to increase the type and number of machines you can drive.

ProofMaster – what's in it for you?

- ISO 12647-7 compliant output
- Comes with FOGRA/UGRA v3 and Idealliance media wedges
- Fine-tunes results through device-link profiles
- Works with high-end color workflows (CMYK, RGB, Multi-channel)
- Accepts all common PDF and image file formats
- Advanced handling of spot colors, fully CxF-compatible
- Provides a handy spot color tuner
- Export ICC reference profiles for use in Adobe and other pre-press applications
- Supports all common spectrophotometers from X-Rite, Barbieri and Epson

Automation

- Easy set up of an unlimited number of proofing or photo printing queues and hot folders
- Automatic media optimization

General

- Works on Mac OSX (10.13 onwards) and Windows 10
- Drives up to three printers per RIP
- Simultaneous rendering and printing for higher efficiency

ProofMaster and ProofMaster Plus.

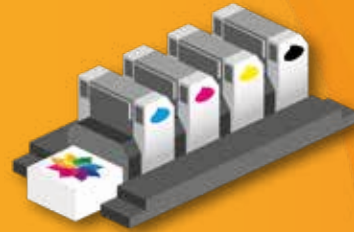

Affordable contract proofing and prototyping.

Versatile proofing for all types of production including packaging design and prototyping

Certification to industry standards

Accurate match between proof and print

ProofMaster Plus Applications

- **ProofMaster Calibrator:** Printer linearization and characterization. Creation of ICC profiles.
- **ProofMaster RIP:** File interpretation and rasterization.
- **ProofMaster Layout:** Desktop-based layout app for easy preparation of proofs.

System Requirements

- Works on Mac OSX (10.13 onwards)
- Processor 2.0 Ghz Intel i5: Memory 8Gb
- Hard Disk SATA/SSD 256GB +

- Windows 10 Professional
- Processor Intel i7: Memory 16Gb
- Hard Disk SATA/SSD 256GB +
